Question: 1-1 of 70 Page: 1 of 70

1 A nurse is initiating continuous enteral feedings for a client who has a new gastrostomy tube. Which of the following actions should the nurse take?

- Measure the client's gastric residual every 12 hr.
- Flush the client's tube with 30 mL of water every 4 hr.
- Obtain the client's electrolyte levels every 4 hr.
- Keep the client's head elevated at 15° during feedings.
